THINKING OF FINANCING NEW BUSINESS EQUIPMENT?

ASSESSING THE NEEDS AND MEANS OF CLIENTS FOR A STABLE FUTURE

1 Advice and Forethought

We take a personal approach, sitting down with you and working together to create a clear trajectory for your business. The secret isn't in the machinery you plan to purchase, but what you plan to do with it. We want to make sure the item in question is income producing, and over time will pay for itself. If we don't think we're able to find a loan that's appropriate, we won't recommend it.

2 Application and Approval

Not a fan of banks? We'll act as the middle man, creating a dialogue and asking all of the tough questions. With well-established relationships with a large number of Australian Banks, we can curate your loan right down to the finest of details. Time is money, we work quickly on getting your loan submitted and approved to ensure your business is up and operating as soon as possible.

3 Settlement

We facilitate tailor made repayments to suit you and your lifestyle. Scared you're going to miss a payment? We will go above and beyond to ensure the best possible outcome for all parties. In our 18 years of business we've never had a repossession. This is the sort of care and diligence we pride ourselves on.
